MAKING  
BATHROOMS  
BEAUTIFUL

**This product is IP44 rated and suitable for installation in zones: 2 & Outside Zone**

All installations must comply with guidelines which are based on a zonal concept. The diagram above illustrates this concept and must be followed to ensure the safe installation of electrical appliances in the bathroom. These regulations apply to domestic installations only. Installations must be made in accordance with the current IEE wiring regulations and relevant building regulations. **HiB recommends that all electrical bathroom products should only be fitted by a suitably qualified, Part P registered electrician.**

Thank you for purchasing this HiB product.

Please read through these instructions carefully and refer back to them during installation to ensure that your product is fitted safely and that it retains its high quality finish.

Please retain this leaflet for future reference.

**Before installation, ensure the domestic electrical mains supply to which the mirror is to be connected is turned off. Before drilling, ensure that there are no hidden cables or pipes in the wall.**

## Operation Instructions

To turn illumination on touch the sensor located on the front of the mirror once. To change the colour temperature, touch and hold the sensor until desired colour is obtained. The colour temperature is then set until changed again.

Heated pad is only on when mirror is illuminated.

## Care Instructions

Do not use abrasives or solvents when cleaning this product. Wipe off all water spillages as soon as possible using a soft, damp cloth.

## Aftercare Service

In the unlikely event that this product should fail please contact HiB customer services, details shown below.

## Illuminated Mirrors

Solstice 60 Art No. 79520700 / Solstice 80 Art No. 79520800

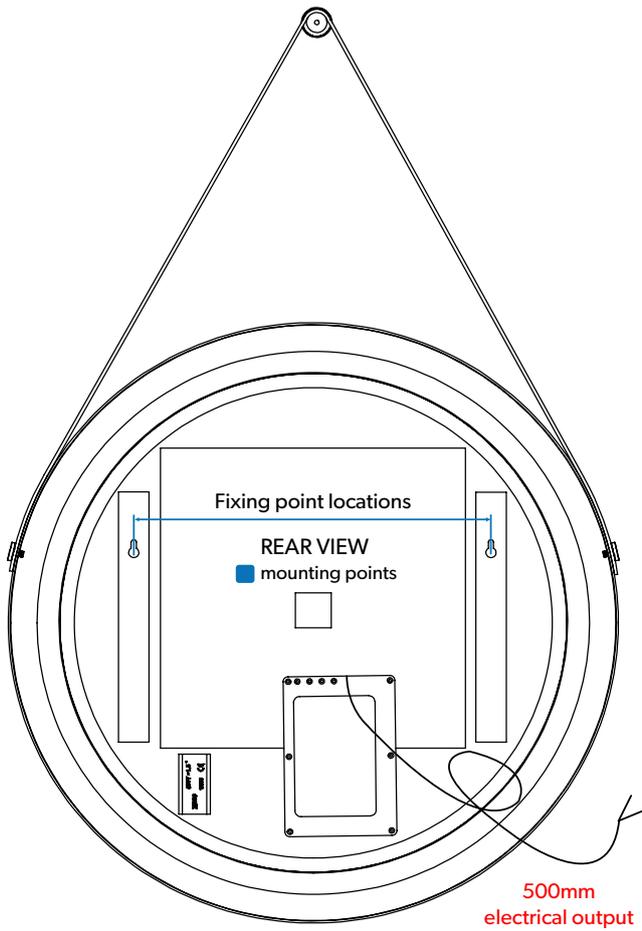

### Installation

1. Position the mirror in a suitable location (according to the zonal diagram - Fig. 1), ensuring that the domestic electrical mains supply is within reach of the cable connection point of the product.
2. Carefully mark the position of the mirror using a soft pencil ensuring it is level. Remove the mirror and mark the mounting points (see Fig. A overleaf). **Please ensure that all marked mounting points accurately match up with the fixing points on the mirror.**
3. Using a suitable drill bit, drill holes in the marked positions to a suitable depth. If drilling through tile, use a ceramic drill bit.
4. Insert wall plugs level with the surface of the wall. If fitting to a tiled surface, wall plugs should be inserted below the tile surface to avoid cracking. *NB. For plasterboard walls, specialist fixings should be purchased, available from any DIY or hardware store.*
5. Screw supplied fixings into wall plugs.
6. Attach the decorative strap to the side of the mirror frame using the bolts provided. (see Fig. B overleaf). **Please note this is not intended to be used as the main weight bearing fixing.**
7. With the mirror in position, carefully mark the position of the strap support hook using a soft pencil and ensuring the strap is taut and the hook is central to the mirror. (see Fig. C overleaf)
8. Remove the mirror from the wall.
9. Again, using a suitable drill bit, drill holes in the marked position to a suitable depth and insert wall plugs.
10. Position the strap support hook and fix in place with the supplied fixings.
11. **Ensure the domestic electrical mains supply to which the mirror is being connected is turned off.** Connect the domestic mains supply to the terminal box according to the wiring diagram. (see Fig. D overleaf)
12. Hang the mirror into position and locate the strap over the hanging support hook
13. Remove the adhesive pad cover from the support hook finishing cap and apply to the support hook.
14. Switch the domestic electrical mains supply for the mirror back on.

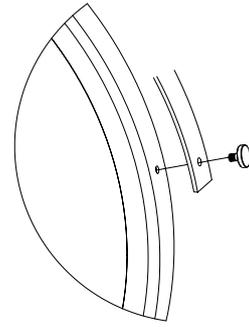

WEEE compliance  
Must not be mixed with general household waste
